Now, we are very excited to share with you the first issue of *Global Journal of Microbiology*, as one of the flagship magazines in the series of global journals published by Scholars Publishing, LLC. This journal serves as a platform for sharing the high quality and important contributions in the frontiers in prokaryotic and eukaryotic microorganisms, such as viruses, bacteria, yeasts, fungi, archaea and protozoa, and all aspects of microbiology, including nomenclature, morphology, structure, replication, expression, function, genetics, enzymology, metabolism, physiology, infection, microbial-host interaction, microbial-environment interaction, pathogenesis, pathology, immunology, diagnosis, treatment, detection, ecology, surveillance, epidemiology, prevention and control, as well as genomics, bioinformatics, biotechnology, vaccines, therapeutics and drugs. To launch the new journal successfully, we thank the supports from authors and our teams including management and editorial boards in the symbiont community. We also expect you to take part in our community to build up better future.

Including *Global Journal of Microbiology*, our Global Journals are peer-reviewed international journals with broad scope covering all areas of the subjects, including basic, translational and applied research. They emphasize novel theories, technologies, biomarkers and therapeutic agents, as well as prevention, early detection and treatment of the diseases. Our editorial boards are supported by global distinguished and well-established scholars. Our aim is to publish scholarly journals with high impact.
